

## Outstrut The Competition!

- 3 Second Cut
- Accepts Standard Strut Profiles
- Thousands of Cuts Per Blade Set
- No Burr or Post Processing
- Portable Design
- Custom Dies Accommodate Any Shape

The Wilton Strut Cutter is an innovative portable hydraulic tool designed to cut strut products cleanly and efficiently, with no waste, no mess, and no de-burring. It is ideal for cutting Unistrut®, Powerstrut®, B-Line®, and Superstrut® strut products. Cutting dies are available for most commercial strut profiles and the Wilton Strut Cutter can also accept custom dies to meet your special application. This tool is not designed for stainless steel or back-to-back strut. The Wilton Strut Cutter can be powered by your 10,000 psi power unit or purchase our Power Kit which includes a dependable SPX 10,000 psi power unit and 6' hose. Our kit is designed for portability, durability, and ease of use. The Wilton Strut Cutter is proudly made in the USA.
